"NEW SCREEN MAGAZINE"

No. 37 - *One Reel*

School desks ^{©CLM 1451} have to be washed in Kansas City just like most of the children and Screen Magazine No. 37 shows how it is done. This magazine also shows Dr. Louis Calvert, inventor of a substitute for gasoline, and it shows how it is made, all except the secret part. Our own chemist shows how to make ice in a red hot dish, while Lillian Russell shows how to have a beautiful neck and a clever young man from Chicago shows how to pack clothes without wrinkles. The Bug Study concerns Mrs. Cricket and her alleged laziness. A futurist movie of Gen. U.S. Grant closes the Magazine.
